# VerityStream™

**Your Source of Truth**

## Aiming Higher to Ensure Your Patients Receive Competent Care From Qualified People

## VerityStream™ for Health Systems, Hospitals, and Health Plans

We've created a truly unique and dynamic platform that delivers a continual stream of enhancements, evidenced-based content, and curated data. The VerityStream solution is revolutionizing 2,500+ medical staff offices and CVO operations with its exclusive capabilities built around the specific needs of health systems, hospitals, and health plans. Our entire ecosystem – platform, content, data, community, and services – harnesses the power of provider data via a single source of truth for all your credentialing, validation, privileging, enrollment, and evaluation needs.

## With VerityStream you get access to:

**An industry-leading forms library** featuring more than 5,000 pre-formatted payer enrollment forms to rapidly enroll providers.

**The largest content database on the market** with thousands of pieces of instantly deployable content to help you manage all your processes including; workflows for initial and recredentialing, expirables management, surveys, API, HL7 imports/exports, dashboards, and more.

**An intuitive and sophisticated automation engine** with configurable delivery of forms, letters, spreadsheets, exports to downstream applications, reports, workflows, surveys, and payer enrollment.

**A comprehensive database of U.S. physicians, nurse practitioners, physician assistants, allied health professionals, and registered nurses** that is updated 3 million times per month and includes demographics, addresses, specialties, licenses, affiliations, education, and expertise details for all who deliver care to your patients.

**Pre-loaded, standardized industry data tables** of payer lists, hospitals, malpractice and insurance carriers, taxonomy, Universities, States, DEA schedules, zip codes, and ICD10 codes.
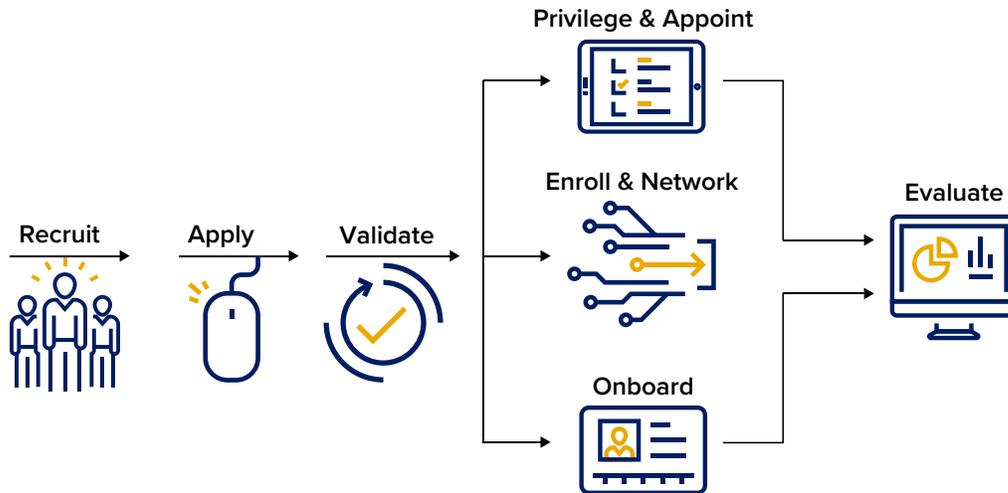

**A continuously updated library of primary source sites** that enables continuous, hands-free monitoring of alerts from OIG, SAM, federal and state exclusion sites, and real time verification of state licenses and specialty board certifications.

**Seamless provider communication** via an always available, one-stop shop for providers and reviewers to complete and review applications, attestations, assigned learning, OPPE profiles, case reviews, and more.

**Benchmarking against industry standards** enabling you to compare your workflow timelines against national, proprietary benchmarks to easily identify and prioritize improvement opportunities.

# Our Streaming Solutions

**VerityStream™ has you covered with an enterprise-wide, SaaS platform that enables everyone in your organization to collaboratively manage the entire provider lifecycle.**

## Recruit
Power up your recruiting efforts with data driven insight into available providers.

## Apply
Bring the application process – configured to your specific needs – online and allow your providers to digitally add and update their own data.

## Validate
Verify and monitor licensure, accreditation, certification, affiliation, sanctions, exclusions, disciplinary actions, malpractice claims, Medicare/Medicaid Opt In/Opt Out, education, training, professional references, and more.

## Privilege & Appoint
Privilege automates and standardizes privilege granting and evaluation with an industry-leading, library of delineated privileges while Appoint ensures reviewer clarity with a centralized view of validated provider files.

## Enroll & Network
Automate the provider enrollment process with the largest, continuously-updated library of pre-formatted payer forms with Enroll and leverage validated provider data and accelerate contract initiation, roster changes, and enrollment renewals with Network.

## Onboard
Create a one-stop shop for managing and tracking activities and events throughout the Provider onboarding process including Employee Health, Malpractice Insurance Underwriting, EMR credentials, Required Learning, etc.
